On behalf of the City of Baton Rouge - Parish of East Baton Rouge, I am excited to introduce Build Baton Rouge’s 2019 Annual Report. This report not only marks the tremendous progress made over the past year, but it also recognizes a decade of redevelopment activity sparked by the initiative, commitment, and vision of the Build Baton Rouge Board and staff. BBR’s work is an essential component of how we achieve my vision of peace, prosperity, and progress. Residents from all over the City-Parish are longing for action to turn the tide of blight and disinvestment that plagues our most challenged neighborhoods. I’m proud of the progress that we’re making and appreciative of BBR’s leadership.

Too many in our community often wonder whether enough is being done to create opportunities in our disinvested neighborhoods. They are right to demand that we work expeditiously to ensure development happens equitably and with the full engagement of the community. In this annual report BBR looks back on the decade of work that preceded the recent breakthroughs at Electric Depot, Ardendale, and the Plank Road corridor. The revitalization of our city’s first power plant, the $30 million U.S. Department of Housing and Urban Development Choice Neighborhoods grant award, the $15 million U.S. Department of Transportation bus rapid transit matching funds award, and the Imagine Plank Road Plan for Equitable Development did not happen overnight. Rather, they are the result of a decade of investment, innovation, and commitment on the part of BBR and many others. This annual report calls on us to reflect on the work that has been done and the progress we are making. When we take in the fullness of the seeds that have been planted, it is easy to embrace bold visions for our future possibilities.

In the first year of my administration I recommitted the City-Parish’s support for Build Baton Rouge. That support not only included an infusion of operating funds, but also new responsibilities to administer our federal community development funding. This decision was pivotal — for the first time in our history we have alignment between our redevelopment planning and our federal community funds deployment. BBR is administering community improvement projects with our neighborhood community development organizations, repairing roofs through our home repair program, and supporting our nonprofit partners in delivering essential social services. We will continue to explore ways to streamline how we utilize federal, state, and local funds to transform the quality of place and quality of life throughout the City-Parish.

Lastly, this annual report honors BBR’s founding Board Chairman, John Noland. I join the chorus of Baton Rouge residents and community leaders in saluting John’s tireless commitment to community development. BBR would not exist if it were not for John’s vision, determination, and philanthropy. I know he has much more to offer Baton Rouge and continue to count on his sage advice and advocacy.

Congratulations to the Board and staff of Build Baton Rouge. We look forward to the next decade of innovation and service.

Yours in partnership,

Mayor-President Sharon Weston Broome

- Mr. Rodney Braxton
- Rev. Leo Cyrus
- Mr. Byron Turner
We continue to grow our land bank as we work with community developers, businesses, and philanthropy to enhance the quality of life in our disinvested neighborhoods while creating a strong quality of place. As we reflect on 10 years of service to Baton Rouge, we are also boldly looking ahead to a bright future. Over the past year our Board, staff, and community partners engaged in a multidimensional strategic planning and branding effort that resulted in the adoption of a new mission, vision, values statement, and – most importantly – a new name. “Build Baton Rouge” captures the possibilities of the next chapter of our work and reflects the holistic approach to community development that Baton Rouge deserves.

Our 2019 Annual Report also includes a tribute to our Founding Board Chairman, now Chairman Emeritus, John Noland. No other business leader has been as committed to community development as John. His decades of leadership, philanthropy, and service led to the establishment of BBR and his influence can be seen in every current endeavor. We know John has much more to give to Baton Rouge and the work of BBR, but we wanted to mark this first decade with a recognition of his immeasurable impact and monumental example.

The Board and staff of BBR believe there is not a single square inch of Baton Rouge that is disposable. All of our city’s neighborhoods, communities, and places deserve the best of our resources, commitment, determination, and political will. We’ve created a strong foundation and have marshalled the tools necessary to pursue new opportunities. We know that our vision for Baton Rouge is attainable – if we work together.

Will you build with us?

Sincerely,

Rodney Braxton
Board Chairman

Christopher J. Tyson
President & CEO
OUR STORY
VISION

Bringing people and resources together to promote equitable investment, innovative development, and thriving communities across all of Baton Rouge.

VALUES

INNOVATION
We embrace an entrepreneurial approach to community development and the transformation of the built environment.

SERVICE
We support partnerships, opportunities, and developments that build the leadership capacity of all members of our community.

EQUITY
We celebrate the success of our city while recognizing its history and the need to expand access to the resources, opportunities, and influence necessary to live, work, and thrive.

INCLUSION
We promote authentic and empowered participation, where all people feel they are heard, respected, and belong.

COMMUNITY COLLABORATION
We prioritize community voice and participation to inform and guide our work.

ACCOUNTABILITY
We approach our work with transparency and integrity to establish and uphold public trust.
Develop and revitalize disinvested areas

Drive economic impact through equitable investment

Advance partnerships to build community-wide capacity

HOW DO WE ACHIEVE THIS?

- We work to transform all of Baton Rouge into a thriving economic center through the elimination of blight and support of business growth and expansion.

- We convene and collaborate with our city’s residents to plan and build a Baton Rouge that has abundant linkages to resources and services, affordable housing, job opportunities, and accessible transportation.

- We foster partnerships to ensure that the gains from economic growth and development benefit all communities. These strategic collaborations build the capacity and leadership of our partners and residents.

- We provide guidance and support for the financing of equitable development projects throughout Baton Rouge.

- We uplift place-making and place-preservation opportunities that draw families, businesses, and culture bearers to live, learn, and stay in Baton Rouge.
Build Baton Rouge’s (BBR) roots date back to 2007 when the Louisiana Legislature established the East Baton Rouge Redevelopment Authority. The Authority began operating two years later, with the goal of leveraging public and private resources to eliminate and prevent the spread of blight, encourage rehabilitation, and revitalize disinvested areas.

BBR got off to a strong start, setting the foundation for transformative initiatives that are still unfolding today. With an award of more than $60 million in federal New Market Tax Credits, the agency spearheaded major developments in its first five years, including the ExxonMobil YMCA on Howell Boulevard, the downtown Hampton Inn and Suites, and the Emerge Center on Innovation Park Drive. It facilitated community improvement plans for five North Baton Rouge neighborhoods and helped finance the mixed-income Elysian I and II apartments as well as the Autumn Place and Willow Creek townhomes.

Even as funding dried up in later years, BBR maintained its relevance and commitment to the community. Early initiatives, including Ardendale planning, business façade improvement grants, and gap financing for affordable housing, continued to move forward, while the agency supported new projects such as planning for the revitalization of the Entergy power plant and the proposed Baton Rouge to New Orleans inter-city rail. When Mayor-President Sharon Weston Broome took office in 2017, she recommitted funding to BBR and, for the first time, aligned redevelopment planning with federal funding administered through the City-Parish Office of Community Development. The new arrangement expanded BBR’s role to include oversight of the City-Parish’s Community Development Block Grants (CDBG) and Housing Opportunities Made Equal (HOME) programs awarded through the U.S. Department of Housing and Urban Development (HUD).

Today, Baton Rouge is seeing the early fruits of BBR’s decade of labor, as years-long projects come to life. Ongoing initiatives all trace back in some way to BBR’s beginnings and the needs long ago identified as key to cultivating an equitable, prosperous, and vibrant future city.
 Major Project Timelines

Imagine Plank Road

The vision of a revitalized, transit-oriented Plank Road corridor dates back to several developments, including the Capital Area Transit System’s (CATS) pursuit of federal matching funding for bus rapid transit; the adoption of FUTUREBR, the city’s comprehensive land use plan; and the efforts of the Baton Rouge Area Foundation (BRAF) to promote a light rail south of downtown. Build Baton Rouge leveraged all of these efforts when it launched the Plank Road master plan, a transit-oriented equitable development plan centered around a $50 million bus rapid transit (BRT) project.

2006-2016
CATS and the City-Parish apply for federal transit funding to support BRT in Baton Rouge but lack the requisite local match to pursue implementation.

2012
In conjunction with the Water Campus, the BRAF begins planning a three-mile light rail line on Nicholson Drive connecting downtown and LSU.

2016
As part of FUTUREBR, Fregonese Associates releases a Florida-Plank Corridor Study calling for BBR, CATS, the City-Parish, and others to collaborate on transit-oriented development, specifically a BRT line.

2017
Mayor-President Sharon Weston Broome takes office and advocates for an expansion and re-envisioning of the light rail project to include North Baton Rouge.

January 2018
BBR convenes CATS, the City-Parish, and DOTD to begin planning a 10-mile BRT service including both Plank Road and Nicholson Drive and leveraging the investments made in the previous light rail project.

October 2018
The Metro Council approves the expansion of BBR’s land bank with 86 vacant, adjudicated properties within the Plank Road corridor. BBR raises over $200,000 in private contributions for planning and community engagement.

January 2019
BBR launches a comprehensive master plan process and engages Asakura Robinson for community and economic development planning for the corridor and greater North Baton Rouge.

March-August 2019
BBR hosts a series of experientially based engagement activities to promote a community-led revitalization effort.

July 2019
CATS and the City-Parish apply for matching funding from the U.S. Department of Transportation for the BRT line.

September 2019
BBR secures a line of credit from the Capital Area Finance Authority to support land development efforts along the Plank Road corridor in conjunction with the master plan.

November 2019
BBR unveils the Imagine Plank Road Plan for Equitable Development, and the City-Parish receives a $15 million federal matching grant to implement the BRT project – the first in Louisiana.
ELECTRIC DEPOT

Redevelopment efforts for the old Entergy power plant on Government Street date back to 2010, setting in motion what would become a $20 million mixed-use redevelopment project in Downtown East.

2010-2012
BRAF and BBR collaborate on due diligence efforts for the acquisition of the six-acre former Entergy site.

2013
Entergy donates the property to BBR.

2014-2015
BBR secures a Brownfields grant from the Louisiana Department of Environmental Quality and addresses site remediation.

2015-2016
BBR begins pre-development planning process with a grant from the Louisiana Office of Community Development. BBR hires Duany Plater-Zyberk & Company as the lead planner.

2016-2017
BBR hires Fregonese Associates to create a site-specific pre-development study. BBR enters into a ground lease and development agreement with Weinstein Nelson, the lead developer for the six-acre site.

2020
Phase II of Electric Depot projected groundbreaking.

JULY 2018
Electric Depot begins generating rent payments for BBR, constituting a recurring revenue source to support additional BBR redevelopment activities.

DECEMBER 2018
BBR delivers the Rail Station Masterplan which articulates a transit-oriented development vision for the areas surrounding Electric Depot.
### ARDENDALE URBAN VILLAGE

Plans for a 200-acre urban infill development began in 2012 with land assembly efforts, leading to what would become Ardendale, a plan for a revitalized community in the Melrose East and Smiley Heights neighborhoods.

</table>
This year, the East Baton Rouge Redevelopment Authority became Build Baton Rouge. While “RDA” rolls easily off the tongue of those familiar with the Authority, the name lacked many of the core elements of a strong brand. As the Authority transitioned from a period of diminished capacity into a relaunch phase, it seized the opportunity to reintroduce itself to the community. Working with local stakeholders, the Board and staff reconsidered the mission, vision, values, and key messaging for the Authority. There was broad agreement that the name was worth changing and “Build Baton Rouge” was born.

Build Baton Rouge thematically, stylistically, and rhetorically advances the Authority’s brand. Thematically, it is in keeping with similar efforts in cities across the country to rename redevelopment authorities in ways that remove “Redevelopment Authority” from prominence. This reflects a departure from 20th-century thinking about how best to address urban disinvestment. Moreover, the word “redevelopment” is implicitly deficits-based in its concern for doing something over. While redevelopment authorities remain committed to improving the built environment, the word “build” better captures the essence of the Authority’s core concerns. “Build” is inherently forward-looking, conveying a constant focus on the future.

With 10 fewer syllables, Build Baton Rouge is shorter than the East Baton Rouge Redevelopment Authority, making it stylistically a more punchy, direct, and concise identity. It also employs alliteration, which is common among successful brands (i.e., Best Buy, Coca-Cola, and Dunkin Donuts) as well as Portland’s renamed redevelopment authority, Prosper Portland. It also lends itself to the memorable shortened form of “BBR”.

Rhetorically, “build” is a word that transforms the Authority’s name into a call to action—one that resonates as Baton Rouge looks to rebuild flood-damaged homes and disinvested neighborhoods, while building inclusive communities and a strong quality of place. By highlighting “Baton Rouge,” the name further establishes the city as a metropolitan identity. This is important as the Authority seeks to raise Baton Rouge’s profile in a global marketplace where midsize metropolitan areas struggle to gain attention and where investors and entrepreneurs are increasingly looking for new cities to serve as laboratories for urban innovation.

The name change to Build Baton Rouge allows the Authority to mark its 10th anniversary with a bold, future-focused, positive rebrand that honors the enthusiasm and hopefulness expressed throughout the community.

Build Baton Rouge’s financial history tells the story of an agency that has done a lot with little. Over the years, BBR has had to operate with limited and varied resources, celebrating any and all support that comes its way in the form of contributions, property transfer income, grants, and New Market Tax Credit management fees. Despite a lack of consistent funding, BBR has never wavered in its commitment to carrying out its revitalization goals throughout Baton Rouge.

**FINANCES**

**REVENUES VS. EXPENSES**

**REVENUE BY SOURCES**

- Grants and Contributions
- Transfers of Property (Inventory)
- New Market Tax Credit Fees
- Other
A key feature of Build Baton Rouge’s statutory authority is its ability to acquire tax-adjudicated properties at no cost via direct transfer from the City-Parish and to hold them in its land bank. Land banks are governmental or nonprofit entities organized to convert vacant, abandoned, and tax-delinquent properties into productive use. These distressed properties destabilize neighborhoods, create safety hazards, drive down property values, and drain local tax dollars. To date, BBR has acquired over 200 tax-adjudicated properties through direct transfer from the City-Parish.

Land banks leverage the tools of real estate development, public finance, and community engagement to develop or transfer distressed property for purposes consistent with community-based plans. These properties are often blighted, which makes land banking a powerful blight remediation tool. Louisiana law defines blighted properties as “vacant, uninhabitable, and hazardous” properties “declared to be a public nuisance by a court.” Colloquially though, “blight” encompasses not only those few properties ever declared “blighted” by a court, but all distressed property.

While blight and tax adjudication are often associated, not all owners of blighted property fall behind on their taxes and not all tax-adjudicated properties have fallen into physical disrepair. Addressing blight has been a struggle in Baton Rouge for a few reasons. First, ordinance violations have not been systematically enforced, allowing blighted properties to slip through the cracks. Second, current Louisiana law makes it difficult to clear title to property held by multiple property owners who have an undivided interest but are unwilling or unable to pay for regular maintenance and property taxes. Third, fines that are assessed for blight have traditionally been added to the property tax bill instead of being separately enforced as individual liens.

In 2019 BBR joined others in championing Act 384 of the Louisiana Legislature, which clarifies the requisite procedures for future tax sales. However, a backlog of properties with questionably valid tax sales remains. These properties often lack an identifiable owner to hold accountable, making them risky to develop and susceptible to falling into disrepair and distress. They require more individualized solutions for returning to commerce and are ideally suited for BBR’s land bank, provided funding can be identified for maintenance, insurance, and clearing title once transferred to BBR.

Land banking makes possible revitalization efforts that prioritize community needs and marshals public finance and philanthropy to create catalytic development. In other municipalities, redevelopment authorities and land banks coordinate resources to return neglected properties to commerce. Successful redevelopment initiatives across the country point to land acquisition and site control as the primary implementation action. Low-cost site acquisition and the clearance of abandoned properties is a key factor in spurring development in neighborhoods long ignored by private investment and stigmatized as risky and unprofitable.

With its redevelopment and land banking functions under one roof, a well-resourced BBR could effectively address blight while enhancing the quality of neighborhoods, using the land bank to stimulate new development. In peer agencies, thousands of properties are held in land banks, generating economic activity that ultimately benefits their bottom lines. Additional funds are generated for more redevelopment activity and the cycle continues. With only 115 properties currently in its land bank, however, Baton Rouge has yet to leverage the full power of land banking to address blight and systemic disinvestment.

Baton Rouge has yet to leverage the full power of land banking to address blight and systemic disinvestment.
For more than 23 years, LaFleur Industries has been in the real estate development business, supporting the needs of the affordable housing market throughout Louisiana. In Baton Rouge, LaFleur has partnered with Build Baton Rouge and the City-Parish to develop 21 single-family housing units in North Baton Rouge with CDBG and HOME funding. Another 10 units are underway, also with the assistance of HOME funding.

“We are committed to making a difference in communities that are often ignored,” owner Brian LaFleur said. “What sets us apart is that we actually care about the individuals and communities we impact with our developments. From the tenants who will live in our units to the local citizens who will benefit from our investment to positively stimulate the local economy through new design and construction-related activities – We care.”

CIPS IN FIVE URBAN NEIGHBORHOODS

In 2011, Build Baton Rouge created Community Improvement Plans (CIPs) for five districts in East Baton Rouge Parish. These plans were community-driven, with residents and stakeholders providing input to guide future reinvestment and development in their communities. The plans provide action-oriented strategies to improve the targeted communities and build upon the momentum of other revitalization efforts underway. BBR continues to focus on the CIP recommendations as a basis for its work in these communities:

1 Scotlandville
2 Zion City / Glen Oaks
3 Choctaw Corridor
4 Northdale & Standard Heights
5 Melrose East

CITY-PARISH AND BBR TARGETED AREAS FOR REDEVELOPMENT

While a significant planning effort, the CIPs lacked any accountability feature to ensure their implementation. In 2018, BBR amended its land banking cooperative endeavor agreement with the City-Parish to codify accountability to the community for the redevelopment plans BBR develops. In doing so, BBR expanded its focus to nine targeted areas reflecting the CIP efforts and existing investments in other neighborhoods. These nine target areas are priorities for eliminating blight and encouraging revitalization:

2 Zion City / Glen Oaks
3 Plank Road
4 Choctaw Corridor
4 Choctaw Corridor
5 Northdale
6 Arden Dale (HUD BRChoice Neighborhoods plan footprint)
7 Melrose East
8 Florida Boulevard
9 Mid City (Entergy site and surrounding areas)
10 Old South Baton Rouge

2019 ANNUAL REPORT
As administrator of the City-Parish’s HUD funding, BBR can align redevelopment planning with the deployment of federal community development funds. In 2019 BBR allocated over $130,000 in HUD grants to community development corporations in five of the targeted areas.

WHAT WE DO
DEVELOP AND REVITALIZE DISINVESTED AREAS

A PLACE TO CALL HOME

We are dedicated to making all of Baton Rouge a great place to live and work. Much of Build Baton Rouge’s work focuses on creating plans for community growth and resilience, developing affordable housing, reducing blight, and increasing property values. When these efforts come together, they stimulate development in areas that have lagged in growth and investment. Over the past 10 years, BBR has facilitated the development of hundreds of affordable housing units in distressed areas as well as commercial and retail development that has revived neighborhood commerce.

More residential and commercial developments are in the pipeline. The $30 million HUD Choice Neighborhoods grant will be used to redevelop the Ardenwood Village apartments, build over 500 units of mixed-income housing, and construct a YWCA Early Childhood and Women’s Center – all on the Arendale property. Affordable mixed-use development is also underway at Electric Depot and in the Plank Road corridor.
As administrator of the City-Parish’s HUD community development funds, Build Baton Rouge manages the Home Rehab and Roof Reset repair programs. The BBR team and its partners completed a $12,000 home rehabilitation in October 2019 for Ms. Augustine Walker on Elgin Street. The project involved interior upgrades and modifications to the home, allowing greater mobility and access for Ms. Walker, a retiree awaiting hip surgery. Following the completion of the project, Ms. Walker penned a letter to BBR and the City-Parish expressing her appreciation.

“First and foremost, I would like to thank God for the City-Parish employees... Everyone was so respectful and extended their kindness towards me. It is the small things that show an act of kindness, such as taking my garbage trash cans out for pick up and bringing them back in. I’m truly blessed to be selected [for the BBR housing rehab program]. I’m very grateful for this program and I love the upgrade.”

- MS. AUGUSTINE WALKER
Following the revitalization of downtown Baton Rouge, community leaders turned their focus to Downtown East, the neighborhoods between downtown and Mid City. Build Baton Rouge set out to help develop housing in the area, eyeing a strip of Spanish Town Road littered with empty lots. BBR provided gap financing for The Elysian, an apartment complex developed by Gulf Coast Housing Partnership. The 100-unit complex opened in 2013 with a mix of affordable and market-rate housing. The development maintained 100 percent occupancy in its first years, leading to the development of a second phase with another 100 units in 2015. A third phase is slated for construction in 2020, adding another 42 units to the residential development.

**THE ELYSIAN**

- 100 units
- $14 million project
- $841,000 in BBR gap financing
- completed in 2013

**THE ELYSIAN II**

- 100 units
- $17 million project
- $806,000 BBR gap financing
- completed in 2019

“Everyone deserves to live in a safe and prosperous community. The neglect must be addressed, and investments must be made.”

- Mayor-President Sharon Weston Broome
DRIVE ECONOMIC IMPACT THROUGH EQUITABLE INVESTMENT

MAKING A LIVING

By promoting equitable investment and innovative development across all of Baton Rouge, Build Baton Rouge helps communities retain and support local jobs as well as provide business assistance to help expand entrepreneurship and business growth. Commercial projects BBR has supported include Istrouma Mattress on Plank Road, the Tessier Building downtown, Broadmoor Shopping Center, and Choctaw Village. New Market Tax Credits are also a powerful tool BBR has leveraged to support developments such as the ExxonMobil YMCA, Hampton Inn & Suites downtown, and the Emerge Center.

Larger-scale projects underway, including Electric Depot in Mid City and Ardendale near Florida Boulevard, also have major impact on economic activity in their respective neighborhoods and for the city as a whole. These projects not only create jobs and generate economic activity, they also expand training and educational opportunities as is the case at Ardendale’s automotive training center.

BUSINESS FACADE IMPROVEMENT PROGRAM GRANTEES

IN FOCUS / ELECTRIC DEPOT

The old Entergy power plant at 1509 Government St. opened in 1916 as the city’s first power plant. As the city grew and expanded, the Entergy facility and the neighborhood surrounding it began to languish. City leaders began exploring redevelopment options for the historic site in 2010 and Entergy donated the property to Build Baton Rouge in 2013. In the years that followed, BBR partnered with firms and community organizations to transform the development into a mixed-use entertainment destination with a new name: Electric Depot.

The redeveloped site opened its restaurant and entertainment venue, Red Stick Social, in 2018. A coffee shop, City Roots, opened at the end of 2019. Additional food retail concepts are in the works, and the second phase of Electric Depot will launch in 2020 with plans for a 100-unit, mixed-income apartment complex. The impact extends beyond this one project. Electric Depot has stimulated interest in burgeoning Downtown East, helping to return the community to its former glory.
ADVANCE PARTNERSHIPS TO BUILD COMMUNITY-WIDE CAPACITY

A TEAM EFFORT

From national agencies to local nonprofits, private sector partners, and community leaders, our list of supporters over the past 10 years is long and growing. Build Baton Rouge is committed to advancing these relationships, sharing knowledge, and expanding the resource base necessary to effectively address disinvestment and blight in Baton Rouge. The power of these partnerships shines in our large, multifaceted planning and community development efforts.

2019 COMMUNITY ENGAGEMENT BY THE NUMBERS

In 2019 BBR expanded its community engagement efforts with the addition of a full-time Community Engagement Specialist and four Community Ambassadors. These individuals help solidify our commitment to authentic and sustained public outreach and engagement.

100+
COMMUNITY PARTNERS AND STAKEHOLDERS ACROSS BATON ROUGE

125
COMMUNITY EVENTS AND ENGAGEMENTS HOSTED AND SUPPORTED

2,500
ATTENDEES AT BBR EVENTS AND MEETINGS

The Imagine Plank Road Plan for Equitable Development features a variety of partners and donors who are making the planning, community engagement, and implementation effort possible.

- $100,000 JPMorgan Chase planning grant
- $15 million Better Utilizing Infrastructure to Leverage Development (BUILD) Transportation grant
- $15 million in MovEBR road improvement program funding
- $50,000 Baton Rouge Area Foundation grant
- $50,000 Co-City Project grant funding for community engagement support
- $25,000 John and Virginia Noland Fund donation
- $42,500 in combined private donations from area businesses
- $865,000 Capital Area Finance Authority line of credit for land bank expansion
In 2011, the City-Parish adopted a 20-year master plan, FUTUREBR, spearheaded by Portland-based Fregonese Associates. The plan identified the Plank Road corridor among areas most in need of new transit investments, sparking a conversation around a long-term redevelopment vision with a focus on bringing bus rapid transit to the corridor. An ambitious alliance of local and national grantmakers, neighborhood community partners, and citizens from North Baton Rouge and beyond participated in the planning and outreach efforts. In November 2019, Build Baton Rouge released the Imagine Plank Road Plan for Equitable Development, a comprehensive corridor masterplan of unprecedented scope and breadth. Both the process and the plan open a new chapter for North Baton Rouge.

For the past two years BBR has worked with CATS, the Louisiana Department of Transportation and Development, the City-Parish, BREC, and others to pursue an interdisciplinary approach to the corridor’s revitalization. BBR also made authentic and sustained community engagement the centerpiece of the effort. More than $50,000 was spent on neighborhood businesses and contractors as well as experientially based engagement activities. These efforts highlighted Plank Road’s assets and invited people to spend time on the corridor. They helped affirm the businesses and residents who never left and showcase the corridor’s potential to everyone committed to making all of Baton Rouge better.

“The strong partnership between the City-Parish, CATS, Build Baton Rouge and other supporting stakeholders for this project ... should serve as a shining example for future infrastructure projects in Baton Rouge.”

- CATS CEO BILL DEVILLE
Perhaps no other individual has had a greater impact on Build Baton Rouge than businessman and former volunteer BBR Board Chairman John Noland. John stepped down in late 2019, but he has created a legacy that has forever changed Baton Rouge for the better.

A pioneer of Baton Rouge’s urban revitalization efforts, Noland was a key figure in the creation of BBR in 2007. Since then, he has generously devoted his time and resources to the Authority’s mission. Noland played an integral role in the years-long work it took to implement major BBR initiatives, such as Ardendale and Electric Depot, and has been an outspoken advocate for an increase in public and private funding of community development.

From years when the Authority was flush with federal dollars to the years when it had to operate on a shoestring budget, Noland remained a consistent face and voice of the organization. He has worked alongside some of Baton Rouge’s most influential community leaders, rallying them around a central cause.

“What stands out most about John is his passion for doing what is right whether it is popular or not,” said his former business partner, Matt McKay, the Chairman and CEO of All Star Automotive Group. “He has an unbelievable sense of fairness in everything he is involved in. The biggest and most important lesson that he taught me is that, ‘To whom much is given, much is expected.’”

BBR partner Pat LeDuff describes Noland as someone whose actions speak for him – and by that, she means he does “less talking, more walking.” Some 30 years ago, LeDuff recalls, Noland took redevelopment officials on a trip to Kansas City to see the revitalization possibilities underway by similar groups. The experience forever changed her approach to community development and continues to motivate the work LeDuff does to improve the Scotlandville community in North Baton Rouge with the help of BBR.

“John Noland is an icon and our unsung hero,” LeDuff said. “Thank you, John, for believing life can and will one day be better for all.”

Long-time BBR Board Member Suzanne Turner echoes the sentiment, calling Noland a “champion for elevating conditions in disenfranchised neighborhoods of Baton Rouge” for decades, which has, at times, been a difficult and lonely job.

“He has, sometimes single-handedly, kept the conversation alive to bring attention and resources to the challenge of redevelopment,” Turner said. “It was his vision for a more equitable community that inspired the creation of the RDA, now Build Baton Rouge, and his leadership that has sustained it.”
